

**Goal to Raise for Our Upcoming CPC Mexico Missions Trip: \$13,000 (Cost for construction materials for the home)**

After the 10:30AM worship service on Sunday May 31, our Mexico Missions Team will host a Taco Lunch to celebrate this great opportunity to build a home for a needy family in Ensenada Mexico alongside our Mission Partner YUGO Ministries.

We will have a table on the patio on Sunday May 31 with the list of items below as a way to contribute beyond the \$13,000. You do not need to buy an item on the list in full - you can donate towards our \$13,000 construction goal or towards the cost of an additional item listed below.

Donate by cash or check to Carmel Presbyterian Church with YUGO in the memo designation. Or donate via ChurchTeams using the "Mexico Mission Donation" designation.

*Scan QR for direct online donation link ->*

Items below are costs incurred **over** the \$13,000 goal:

**Baño/Outhouse**

Most of the families do not have access to indoor facilities and require an outhouse. This baño comes fully constructed and is delivered to your ministry site.

**Outhouse: \$415.00**

**Propane Stove**

The family you'll be serving will most likely be accustomed to using a small camping stove or cooking over an open fire. This small stove is a great way to move the cooking indoors.

**Propane Stove w/ tank and hose: \$340**

## Housewarming Basket

Baskets include four place settings (plates, silverware, napkins, glasses, bowls, etc.), a few decorations, bedding, blankets and pillows for four beds, and all the curtains you'll need for for the 4 windows and 2 door openings. If your family is larger than 4 you may choose to purchase additional items. Colors and styles will vary.

**Housewarming Basket: \$300**

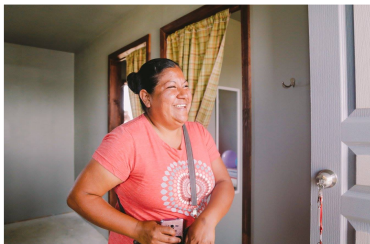

## Food Basket

These baskets include a variety of much needed grocery items commonly purchased by families in the Baja culture. These baskets are especially designed to promote healthy cooking and eating. Contents will vary.

**Food Basket: \$90**

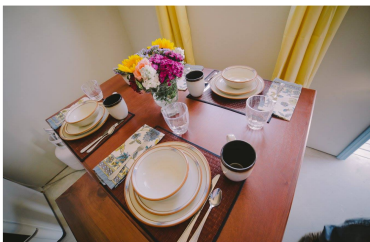

## Hand Made Curtain Rods

Your construction team will need curtain rods to install curtains on the windows and door openings. A YUGO staff member hand makes the rods and brackets. These can be easily painted or stained and are specifically designed for the YUGO house.

**Curtain Rod / Bracket Set: \$105**

## Hand Made Dining Table

A beautiful hand made dining table with benches for 4 people. These tables are made by a YUGO staff member and are delivered to your team on Thursday morning of the build week. These tables are the perfect size for the YUGO house.

**Dining Table: \$220**

## Solar Power System

For families who do not have access to power in the community, we can offer a solar panel and battery power system. These systems are installed on site on the last afternoon of the building project and include all materials and installation. This can be a life changer for a family!

**Complete Solar Power System: \$1650**

## Kitchen Cabinets with Sink

One really cool way to help the family utilize space inside the home, is to install kitchen cabinets. These cabinets offer lots of storage space as well as some countertop and a sink for future plumbing. The cabinets have a spot for a future stove or refrigerator.

**Kitchen Cabinets with Sink/Counter: \$850**

## Baseboards

YUGO house plans do include drywall interiors but they do not include baseboards. Some groups choose to install baseboards to give the drywall a clean, finished look around the concrete floors. YUGO can provide the wood and the leadership for installing baseboards and your missions team can provide the labor. This wood can be delivered to your job site and your team can install the baseboard close to the end of the building process.

**Baseboards: \$150**
